Skills

TypeScript
Python
Tests and reviews

Strengths

Clear reviews

Writes the comment once so the next review is shorter.

Structure

Puts a slow query into one sentence a teammate can test.

Projects

Catalogue search

Stayed under a second after the collection passed a million rows.

Review checklist

Cut the repeat comments on pull requests.

Motivation letter

Application as a software engineer, a made-up vacancy

Rae Okonkwo is a made-up software engineer. This letter belongs to nobody and the vacancy is invented.

Dear hiring team,

A question, then the page

I start with what was slow or unclear. At Example Catalogue Ltd, a company that exists only in this letter, I shipped a search path that stayed under a second after a million made-up rows.

Reviews a teammate can follow

At Example Bureau the checklist was for a team that was never real. Write the comment once, then the repeats get shorter.

A search result a stranger can check in one sentence.
A review checklist of one page.
Notes that still match after the page is saved.

Experience

Software engineer

2022 - 2024 Example Catalogue Ltd
Shipped a search path that stayed under a second after a million made-up rows.

Software engineer

2020 - 2022 Example Bureau
Wrote a review checklist that cut the repeat comments on pull requests.

Education

Computer science

2016 - 2020 Example University
A graduation project about a search index that never left the classroom.

I will gladly explain this made-up application in a meeting that also does not exist.

Rae Okonkwo
